

Welcome to

OWASP AppSec Research 2010

#OWASP #AppSecEu

Swedish IT Newspaper December 2007:

A good way to get advice on securing web applications is to go to the OWASP wiki. Now there is a Swedish chapter.

So far, the Swedish chapter has only attracted 50 members, but John Wilander has big plans and hopes for the future.

– In a couple of years, I hope that Sweden and Stockholm can host the European OWASP conference, he says.
