Agenda for Meeting

- OWASP Intro
- Delaware Chapter
- Presentation: Year of the Goat!
- Attendee survey
- Closing thanks

OWASP Intro

<http://bit.ly/owaspDEintro2> brief OWASP intro

or...

- OWASP is an **open community** dedicated to enabling organizations to **build and maintain trusted applications**.
- All of the OWASP tools, documents, forums, and chapters are **free and open to anyone** interested in improving application security.
- The OWASP Foundation is a not-for-profit entity that ensures the project's long-term success.

www.owasp.org

OWASP Delaware Chapter

Official Home: <http://bit.ly/owaspDEhome>

Meetup Home: <http://bit.ly/owaspDE> (RSVP, etc)

Twitter: @owaspde

Contact Info: david.rhoades@owasp.org

[] Action Item: join the mailing list <http://bit.ly/owaspDEmail>

very low volume

OWASP Delaware Chapter Needs

- Speakers, speakers, speakers

- Several short, useful talks vs. one longer presentation

- Social media maven

- Facebook, Twitter, Archie, Gopher...all dat

- Special Projects?

- Something the DE chapter can contribute to the community.
- Build your resume / portfolio

Hot off the press - free training

Java Security Bootcamp:

Tuesday, March 10, 2015 at 10am PST

Java is commonly used to create robust web applications, but it suffers from many known vulnerabilities. We discuss mechanisms to secure applications such as authentication, access control, input validation, contextual encoding, using encryption properly, secure password storage and many more.

Hot off the press - free training

- For more info check out
- <https://info.whitehatsec.com/Q115-Bootcamp-Webinar-Series-Registration.html>
- or <http://bit.ly/1C6c7xo>
- **Not an endorsement.** I saw this via email recently and thought people here might like to know.

OWASP WebGoat

A deliberately insecure application that allows interested developers just like you to **test vulnerabilities** commonly found in Java-based applications that use common and popular open source components.

Learn about web app security flaws; practice your pen testing foo.

v6 is underway - very easy to run and try out

WebGoat v6

Home: <http://webgoat.github.io/>

Installation (WebGoat 6.0) · WebGoat/WebGoat Wiki

[https://github.com/WebGoat/WebGoat/wiki/Installation-\(WebGoat-6.0\)](https://github.com/WebGoat/WebGoat/wiki/Installation-(WebGoat-6.0))

WebGoat v6 Setup

Download and unzip the JAR

Run JAR

```
$ java -jar WebGoat-6.0.1-war-exec.jar -httpPort 9090
```

I used -httpPort to change from port 8080 (already in use for Web Security Dojo) to 9090

Point browser at <http://localhost:9090/WebGoat>

You should see a login screen.

Live Demo Time

- See what you miss when you don't attend the meetings?
- Oh wait, I guess you can't see because you're not here. 😞
 - OK, technically I'm not "here" (or "there"), but let's not quibble over terminology. 😊
- For those that care, tonight I am using The Web Security Dojo VM (<https://dojo.MavenSecurity.com>) to demo:
 - WebGoat v5 and v6,
 - Burp Suite Free
 - OWASP ZAP

In conclusion - Learn & Practice

- <http://webgoat.github.io/>
- Check it out, and get involved
 - Report bugs
 - Make new lessons

Special Thanks to...

Today's speaker: David Rhoades of MavenSecurity.com

Wilmington University for food, shelter, and love.

Computer & Network Security B.S degree
